School Climate vs School Culture

Student culture reflects the values, beliefs, and behaviors shared by a group of people

All students experience the climate of a school differently.

Community and family factors!

How are climate and culture the same? How are they different?

Measuring School Climate

Information collection at the school level to create a safe learning place for teaching and learning

1. Identify your team
2. Identify the intended goal of data collection
3. Select valid and reliable measurements needed to address your goal
4. Comprehensive surveys provide an assessment of school climate across several domains.
5. Brief school climate measures provide an overall snapshot of climate and can provide useful data with multiple administrations over time.

Examples of Data Usage

Academic Data, Absentee Data, Discipline Date, Healthy Youth Survey, Climate and Culture Survey
